EDUCATION

- **BS in Computer Science**

University of Sindh, Jamshoro, Pakistan

2022 – 2026

Achievement: 1st Position in BS
Computer Science

Final Year Project: AI-based
Healthcare Diagnostic System (Django +
YOLOv12s + ML Models)

AWARDS & CERTIFICATIONS

- **Google Career Certificates**
- Google IT Automation with Python Professional Certificate
- Configuration Management and the Cloud.
- Troubleshooting and Debugging Techniques
- Introduction to Git and GitHub
- Using Python to Interact with the Operating System
- Crash Course on Python
- **Programming & Development**
- HTML5, Python & Flask (Udemy)
- Python Essentials 1 & 2 (Cisco)
- Introduction to Python (DataCamp)
- **Data Science & Analytics**
- Data Analytics Internship (DevelopersHub Corporation)
- Data Analytics Essentials (Cisco)
- Data Manipulation & Joining Data with Pandas (DataCamp)
- Introduction to Data Science (Cisco)
- **Artificial Intelligence**
- Introduction to Modern AI (Cisco)

PROFESSIONAL SUMMARY

Software Engineer specializing in Backend Development and Python-based systems with hands-on experience in Django, Flask, REST APIs, and database-driven applications. Strong foundation in building scalable backend architectures, integrating machine learning models, and developing AI-powered solutions.

Currently working as an Application Trainer & Support Officer at Liaquat University of Medical & Health Sciences, contributing to digital transformation by training healthcare professionals and supporting enterprise software systems.

Co-author and presenter of a research paper at the International Conference on Computing Sciences and Emerging Trends (CSET'26), focusing on AI-based medical diagnosis systems using multimodal machine learning.

PROFESSIONAL EXPERIENCE

APPLICATION TRAINER & SUPPORT OFFICER

LIAQUAT UNIVERSITY OF MEDICAL & HEALTH SCIENCES (LUMHS)

Jan 2026 - Present

- Train faculty, doctors, and administrative staff on digital systems and healthcare applications
- Provide technical support, troubleshooting, and system onboarding assistance
- Support implementation of digital transformation initiatives
- Prepare documentation and user guides for software systems.

RESEARCH PAPER CO-AUTHOR & PRESENTER

INTERNATIONAL CONFERENCE ON COMPUTING SCIENCES & EMERGING TRENDS (CSET'26), QUEST NAWABSHAH

Dec 2025 – Mar 2026

- Co-authored research paper: Skin Diseases Detection and Diagnosis Support System using YOLOv12s and Late Fusion Technique
- Developed multimodal AI system combining computer vision and clinical symptom analysis
- Achieved 79.17% accuracy across multiple skin disease categories
- Contributed to model training, evaluation, and system design.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Java, C, Dart, Embedded C
- **Backend Development:** Django, Flask, REST APIs, Authentication Systems
- **Databases:** MySQL, PostgreSQL, SQLite, Oracle
- **AI / Machine Learning:** TensorFlow, PyTorch, Scikit-learn, YOLOv12s, LSTM, RNN, Transformers
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Android Studio, IntelliJ
- **Software Engineering:** OOP, SDLC, Agile, System Design Basics

TECHNICAL TOOLS & PLATFORMS

- Visual Studio Code, IntelliJ, Android Studio
- Google Cloud
- Git, GitHub, GitLab
- MySQL Workbench, Oracle SQL Developer, phpMyAdmin
- Seaborn, Pandas, Jupyter
- Power BI, Tableau, Google Analytics

AI DEVELOPER INTERN

Evolvian Softwares (Pvt.) Ltd. · Internship

Jul 2025 – Oct 2025

- Developed AI-driven features using Python, integrating machine learning models into real-world applications.
- Assisted in data preprocessing, model training, and evaluation to improve prediction accuracy.
- Collaborated with senior developers to deploy and optimize AI and backend solutions.

BACKEND DEVELOPER INTERN

MEHRAN SUGAR MILLS LIMITED, TANDOALLAHYAR

Jun 2025 – Aug 2025

- Supported backend development and database management tasks
- Assisted in maintaining internal enterprise applications
- Optimized server-side logic and data handling processes.

CAPSTONE PROJECT COORDINATOR

INSTITUTE OF MATHEMATICS AND COMPUTER SCIENCE

May 2025 – Feb 2026

- Coordinated final year projects across multiple student teams
- Managed timelines, milestones, and academic deliverables
- Facilitated communication between students and faculty mentors.

RESEARCH & PUBLICATIONS

SKIN DISEASES DETECTION AND DIAGNOSIS SUPPORT SYSTEM USING YOLOV12S AND LATE FUSION TECHNIQUE

INTERNATIONAL JOURNAL OF INNOVATIONS IN SCIENCE AND TECHNOLOGY (IJIST)

- Published peer-reviewed journal article:
<https://journal.50sea.com/index.php/IJIST/article/view/1723>
- Proposed a multimodal AI-based diagnostic framework combining computer vision (YOLOv12s) with clinical feature-based machine learning models
- Improved diagnostic performance through late fusion strategy integrating image and symptom-level predictions
- Demonstrated effectiveness for multi-class skin disease classification in low-resource healthcare settings.

CONFERENCE PUBLICATION – CSET'26

INTERNATIONAL CONFERENCE ON COMPUTING SCIENCES AND EMERGING TRENDS, QUEST NAWABSHAH.

- Presented research on AI-based skin disease detection system
- Contributed to model design, training pipeline, and evaluation framework.
